

<b>Domain</b>	<b>CLOTHING PRODUCTION</b>	<b>Unit ID: 139</b>
<b>Title:</b>	<b>Apply quality standards in a clothing production environment</b>	
<b>Level: 1</b>		<b>Credits: 3</b>

### Purpose

This unit standard specifies the competencies required to apply quality standards in a clothing production environment. It includes assessment of work, assess quality of received component parts, measuring parts and reporting causes of quality deviations. This unit standard is intended for those who work in the clothing production industry.

### Special Notes

1. Entry information  
Prerequisite
  - Unit 130 - *Follow workplace safety procedures in a clothing production environment* or demonstrated equivalent knowledge and skills.
2. To demonstrate competence, at a minimum, evidence is required of assessing own work, assessing quality of received component parts, measuring parts and reporting causes of quality deviations.
3. Assessment evidence may be collected from a real workplace or a simulated real workplace or an appropriate simulated realistic environment in which clothing production operations are carried out.
4. Performance of all elements in this unit standard must comply with all relevant workplace requirements and /or manufacturer's specifications.
5. Regulations and legislation relevant to this unit standard include the following:
  - Labour Act, No. 6, 1992
  - Occupational Health and Safety Regulations No. 18, 1997
 and all subsequent amendments.

### Quality Assurance Requirements

This unit standard and others within this subfield may be awarded by institutions which meet the accreditation requirements set by the Namibia Qualifications Authority and the Namibia Training Authority and which comply with the national assessment and moderation requirements. Details of specific accreditation requirements and the national assessment arrangements are available from the Namibia Qualifications Authority and the Namibia Training Authority on [www.nta.com.na](http://www.nta.com.na)

## **Elements and Performance Criteria**

### **Element 1: Assess own work**

#### **Performance Criteria**

- 1.1 Completed work is checked continuously according to workplace specifications.
- 1.2 Faulty pieces and final products are identified and removed.
- 1.3 Faults are recorded.

### **Element 2: Assess quality of received component parts**

#### **Performance Criteria**

- 2.1 Received materials, component parts and final products are continuously checked against workplace standards and specifications.
- 2.2 Faulty materials and component parts are identified and removed.
- 2.3 Causes of any identified faults are reported, recorded and corrective action is taken according to workplace specifications and within scope of responsibility.

### **Element 3: Measure parts**

#### **Performance Criteria**

- 3.1 Materials, component parts and products are measured according to workplace specifications.

### **Element 4: Report causes of quality deviations**

#### **Performance Criteria**

- 4.1 Causes of deviations from specified quality standards for materials, component parts or final products are investigated and reported according to workplace specifications.
- 4.2 Preventative actions are recommended based on workplace quality standards.
