

	Unit ID: 1117
Domain	HEAVY EQUIPMENT OPERATIONS
Title:	Work around water hazards as part of surface mining and quarrying activities
Level: 2	Credits: 5

Purpose

This unit standard is intended for those who work in surface mining and quarrying operations. People holding credit for this unit standard are able to: Plan and prepare for work; operate equipment safely in and around water hazards; complete work related documents; and clean up work area.

Special Notes

1. Entry information:
 - Prerequisite
 - Unit 1113 - *Comply with health, safety and environmental rules and regulations pertaining to heavy equipment operations*
2. Assessment evidence may be collected from a real workplace or a simulated workplace in which surface mining and quarrying operations are carried out.
3. Safe working practices include but are not limited to day-to-day observation of safety policies and procedures, and compliance with emergency procedures.
4. Performance of all elements in this unit standard must comply with all relevant legal and workplace requirements, contractual agreement and/or manufacturers' specifications.
5. Regulations and legislation, including subsequent amendments, relevant to this unit standard may include but are not limited to the following:
 - Labour Act, No. 11 of 2007
 - Regulations relating to the Health and Safety of employees at work, 1997 and industry specific regulations, legislations, code of practice, or code of conduct.

Quality Assurance Requirements

This unit standard and others within this subfield may be awarded by institutions which meet the accreditation requirements set by the Namibia Qualifications Authority and the Namibia Training Authority and which comply with the national assessment and moderation requirements. Details of specific accreditation requirements and the national assessment arrangements are available from the Namibia Qualifications Authority and the Namibia Training Authority on www.nta.com.na.

Elements and Performance Criteria

Element 1: Plan and prepare for work

Performance Criteria

- 1.1 Work instructions, including plans, specifications, quality requirements and operational details are obtained, explained, clarified and applied to the allocated task.
- 1.2 Safety requirements including personal protective clothing, safety signs, warning signals and equipment are obtained from the site safety plan, workplace policies and procedures, and applied to the allocated task.
- 1.3 On-site traffic control requirements are obtained, explained, clarified and observed in accordance with allocated task.
- 1.4 Plant, tools, fuel, lubricants, equipment, attachments and accessories selected to carry out tasks are checked for consistency with the requirements of the job, their usability and any faults rectified or reported prior to commencement of work.
- 1.5 Environmental protection requirements are identified from the project environmental management plan and applied to the allocated task.

Element 2: Operate equipment safely in and around water hazards

Range

Nature of work may include but is not limited to dumping and dozing soil and rocks into water; installing pumps; carrying out dewatering tasks; barges; and dredging.

Performance Criteria

- 2.1 Work instructions are obtained and confirmed in line with workplace procedures and legislative requirements.
- 2.2 Safety of personnel working around water hazards is ensured in line with workplace procedures.
- 2.3 Nature of work is carried out according to allocated task and workplace requirements.
- 2.4 Hazards or potentially hazardous conditions are reported to designated personnel in line with workplace procedures.

Element 3: Complete work related documents

Performance Criteria

- 3.1 Work related documents are completed in accordance with contract and workplace requirements.
- 3.2 Maintenance and service related documents are completed in accordance with manufacturer and workplace requirements.

- 3.3 Documents related to accidents or other incidents are completed in accordance with workplace requirements.

Element 4: Clean up work area

Performance Criteria

- 4.1 Work area is cleared and materials disposed of or recycled in accordance with project environment management plan.
- 4.2 Tools and equipments are cleaned, checked, maintained, serviced and stored in accordance with manufacturers' recommendations and standard work practices.
- 4.3 Unused materials are safely stored and stacked for future use.
