Purpose

This unit standard is intended for those who work in surface mining and quarrying operations. People holding credit for this unit standard are able to: Plan and prepare for work; start and shut down service vehicle; load, transport and unload materials or supplies; complete work related documents; and clean up work area.

Being credited with this unit standard does not enable a person to drive the vehicle on an open, public road. In order to do so, a person must be in possession of a valid and current driving licence relevant to this vehicle type.

Special Notes

1. Entry information:

   Prerequisite
   - Unit 1113 - Comply with health, safety and environmental rules and regulations pertaining to heavy equipment operations

2. ‘Service vehicle’ refers to vehicles with a gross vehicle mass (GVM) not exceeding 16 000 kg, used to transport supplies, materials, and/or lubricants as part of surface mining and quarrying operations.

3. Expected worksite production target are to be met.

4. Assessment evidence may be collected from a real workplace or a simulated workplace in which surface mining and quarrying operations are carried out.

5. The credit allocated for this unit standard assumes that the candidate has the required driving licence.

6. Equipment, tools and material may include but are not limited to machine attachments, personal protective equipment, safety signs, fuel, specified oil and lubricants, and accessory tools.

7. Maintenance may include but is not limited to cleaning, authorised servicing and the monitoring, recording and reporting of faults. It may also include the conduct of authorised minor replacements and the provision of assistance to maintenance and repair activities.

8. Safe working practices include but are not limited to day-to-day observation of safety policies and procedures, and compliance with emergency procedures.

9. Performance of all elements in this unit standard must comply with all relevant legal and workplace requirements, contractual agreement and/or manufacturers’ specifications.
10. Regulations and legislation, including subsequent amendments, relevant to this unit standard may include but are not limited to the following:
   - Labour Act, No. 11 of 2007
   - Regulations relating to the Health and Safety of employees at work, 1997
   - Road Traffic and Transport Regulations No. 52, 1999
   - Government Notice No 53 Road Traffic and Transport Regulations
   - and industry specific regulations, legislations, code of practice, or code of conduct.

**Quality Assurance Requirements**

This unit standard and others within this subfield may be awarded by institutions which meet the accreditation requirements set by the Namibia Qualifications Authority and the Namibia Training Authority and which comply with the national assessment and moderation requirements. Details of specific accreditation requirements and the national assessment arrangements are available from the Namibia Qualifications Authority and the Namibia Training Authority on [www.nta.com.na](http://www.nta.com.na).

**Elements and Performance Criteria**

**Element 1: Plan and prepare for work**

**Performance Criteria**

1.1 Work instructions, including plans, specifications, quality requirements and operational details are obtained, explained, clarified and applied to the allocated task.

1.2 Safety requirements including personal protective clothing and equipment are obtained from the site safety plan, workplace policies and procedures, and applied to the allocated task.

1.3 On- and off-site traffic control requirements are obtained and implemented in line with workplace requirements.

1.4 Plant, tools, fuel, lubricants, equipment, attachments and accessories selected to carry out tasks are checked for consistency with the requirements of the job, their usability and any faults rectified or reported prior to commencement of work.

1.5 Environmental protection requirements are identified from the project environmental management plan and applied to the allocated task.

**Element 2: Start and shut down service vehicle**

**Performance Criteria**

2.1 Pre-operational checks are carried out according to appropriate checklist and workplace procedures.

2.2 Daily and weekly operator maintenance is performed according to appropriate checklist and workplace procedures.
2.3 Start-up and shutdown procedures are followed according to manufacturer’s specifications.

2.4 Operating hours are recorded, if required, in accordance with workplace requirements.

2.5 Service vehicle maintenance and faults are reported in accordance with workplace requirements.

**Element 3: Load, transport and unload materials or supplies**

**Performance Criteria**

3.1 Work instructions are obtained and confirmed in line with workplace procedures.

3.2 Vehicle is secured from movement while loading and unloading.

3.3 Load limitations are observed.

3.4 Load is secured and transported to or from site according to workplace procedures.

3.5 Service vehicle is unloaded without causing damages to the vehicle and load according to workplace procedures.

**Element 4: Complete work related documents**

**Performance Criteria**

4.1 Work related documents are completed in accordance with contract and workplace requirements.

4.2 Maintenance and service related documents are completed in accordance with manufacturer and workplace requirements.

4.3 Documents related to accidents or other incidents are completed in accordance with workplace requirements.

**Element 5: Clean up work area**

**Performance Criteria**

5.1 Work area is cleared and materials disposed of or recycled in accordance with project environment management plan.

5.2 Plant, tools and equipments are cleaned, checked, maintained, serviced and stored in accordance with manufacturers’ recommendations and standard work practices.

5.3 Unused materials are safely stored and stacked for future use.
