 - Labour Act, No. 11 of 2007
 - Regulations relating to the Health and Safety of employees at work, 1997
 - Road Traffic and Transport Regulations No. 52, 1999 and Government Notice No 53 Road Traffic and Transport Regulations
 and all industry specific regulations, legislations, code of practice, or code of conduct.

Quality Assurance Requirements

This unit standard and others within this subfield may be awarded by institutions which meet the accreditation requirements set by the Namibia Qualifications Authority and the Namibia Training Authority and which comply with the national assessment and

moderation requirements. Details of specific accreditation requirements and the national assessment arrangements are available from the Namibia Qualifications Authority and the Namibia Training Authority. All approved unit standards, qualifications and national assessment arrangements are available on the Namibia Training Authority website www.nta.com.na.

Elements and Performance Criteria

Element 1: Obtain road traffic signs

Performance Criteria

- 1.1 Road traffic signs required for the work are identified in terms of statutory requirements.
- 1.2 The road traffic signs required are sourced and confirmed according to workplace procedures.
- 1.3 Road traffic signs are stored according to workplace procedures.

Element 2: Maintain road traffic signs

Range

Structural defects include but are not limited to missing rivets, nuts and bolts, cracked welds, damaged stands and bases.

Performance Criteria

- 2.1 Road traffic signs are checked for bitumen, road grime, concrete, diesel and paint and are cleaned in line with workplace requirements.
- 2.2 Road traffic signs are checked for structural defects and compliance with traffic regulations.
- 2.3 Road traffic signs with non-repairable panels and other defects are replaced in line with workplace requirements.
- 2.4 Ways of preventing defacement and damage of signs are applied in line with workplace requirements.

Element 3: Arrange for transport of road traffic signs and materials to the site

Performance Criteria

- 3.1 Site access and delivery arrangements are confirmed in line with workplace procedures.
- 3.2 Availability of loading and unloading equipment is determined.
- 3.3 Transporting of signage is arranged according to workplace procedures.
- 3.4 Signs are appropriately protected and packed safely for transport.
- 3.5 Required signs and equipment are verified as being correctly loaded according with workplace procedures.

Element 4: Assemble and erect traffic signs

Performance Criteria

- 4.1 Sign components are laid out and checked prior to assembly.
- 4.2 Signs are assembled on and off site according to workplace specifications.
- 4.3 Signs are erected efficiently and safely in line with any drawings and specifications.
- 4.4 Temporary traffic control is arranged according to regulatory requirements.
- 4.5 Work area is cleared and materials disposed of or recycled in line with project environment management plan.
- 4.6 Plant, tools and equipments are cleaned, checked, maintained and stored in line with manufacturers' recommendations and standard work practices.
- 4.7 Unused materials are safely stored, stacked for future use and recorded in accordance with workplace procedures.
